EXTRA LARGE CHEST & ROLLER COMBO

MODEL VI-008XL CHEST

Features 8 drawers with chrome pulls, suspended by full length drawer slides. Folding cover is double constructed for added rigidity and is equipped with heavy duty lock that secures cover at both sides. Includes tote tray.

MODEL VI-009XL ROLLAWAY

9 drawer rollaway with chrome pulls. Offers rugged and spacious room for large tools. Heavy duty construction means this unit will last for years. Bottom is 16 ga. steel with welded reinforcing. Unit rolls freely on heavy duty 5" casters. A dual action locking bar prevents damage to locking mechanism, a standard feature on all of our rollaways.

MODEL VI-013XL INTERMEDIATE CHEST

For use between VI-008XL and VI-009XL. Adds storage and convenience to these extra-large units.

HEAVY DUTY CHESTS

THE PROFESSIONAL CHOICE MECHANIC'S TOOL CHESTS

191.95

All of our chests feature 20 ga. welded steel construction and heavy-duty roll formed drawer slides. All top chests have a drop front panel, and lock in place lid supports for added safety. The security locking system features a cabinet lock with brass tumblers, and a two point locking rod that prevents any access to the chest. They also include a lift-out tray with socket divider. Completed with a baked enamel finish inside and out, they also have chrome pulls and a 90 degree stop handle on each end for easy transport.

*Also available with felt lined drawers and brown wrinkle finish. Contact your distributor for details.

MODEL VI-1111

Our largest standard chest with 11 drawers, divided top compartment, lift-out tray with socket divider and security lock system.

Note: We manufacture hundreds of different specialty tool boxes. Chances are we make the box you're looking for. Grinders, drills, saws, auto body specialty, socket sets — we make them all. If your quantities are small, we can piggy back your order with another to offer greater savings. Check with manufacturer's representative for a box that will fit your needs. Your design or ours, we offer competitive prices to put you ahead of your competition. (See back cover.)

CONSTRUCTION FEATURES

ROLLAWAY FEATURES

LOCKING SYSTEM

Our automatic locking system prevents damage to the locking arm if one drawer is closed while the other drawers are already closed and locked. With this system, the last drawer closed locks and stays locked.

REINFORCED BASE

The bottom shelf of our rollaways are fabricated with 16 ga. steel, reinforced with two 16 ga. 90 degree steel brackets, which are welded to the bottom. Heavy duty casters are bolted through the shelf. Weld nuts are placed on the inside of the shelf, for ease in mounting the casters.

DRAWERS

Drawer fronts are 18 ga. steel, and are formed to yield maximum stability. Chrome pulls are added to brighten the finish of the box.

DRAWER SLIDES

Heavy duty, full length drawer slides are one piece construction. They are designed to slide smooth and easy with heavy loads. Spring steel clips prevent pull-out yet allow full access to depth of drawer.

CHEST FEATURES

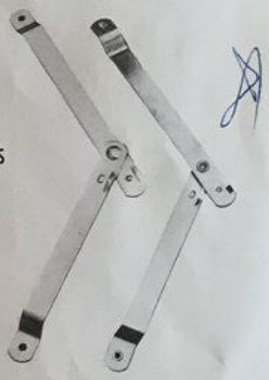
Rugged heavy duty side handles stop at 90 degrees to prevent hand injury and provide better lifting.

Full length piano hinges are staked to prevent pin removal.

Double locking arms located in the door snap through holes in the chest inner wall. The arms are operational only with the key.

Heavy duty lock with brass tumblers comes with 2 keys.

Two positive locking lid supports help our chests remain safe and sturdy for years of service.



CONSTRUCTION SPECIFICATIONS

ROLLAWAYS

Models VI-513, VI-515, VI-616, VI-009XL

CASE PART	CONSTRUCTION
Top Shelf	18 ga. steel

HAND CARRY AND UTILITY BOXES

Models VI-900, VI-904, VI-910, VI-920

- All units are fabricated from 20 ga. steel.
- All catches are heavy duty nickel plated, and securely fastened.
- Larger cases have extra features to provide ease of handling, safety, and security.

WARRANTY

All products manufactured are warranted against failure due to defective or faulty material and workmanship.

CABINETS AND CHESTS

Models VI-113, VI-116, VI-1111, VI-1210 XD, VI-313, VI-313XD, VI-008XL, and VI-013XL. Also includes Models VI-01, VI-2, VI-5, VI-7 and VI-50.

- All case parts are fabricated from 20 gauge steel (.0359). This includes the case shell, interior parts and drawers. The larger units (VI-008XL, VI-1210XD) have reinforcements welded to the inside cover and door for added rigidity.
- All chests have covers that fold down to secure the drawers. Also included is a two-point locking system to add security.
- All chests have heavy duty weld on side handles with 90 degree stop for easier lifting and to prevent hand injury.
- All covers and doors have full length piano hinge, staked to prevent pin removal.
- All chests have two positive locking cover supports, to prevent injury or damage and to add stability.
- All chests are provided with lift-out tote tray with socket divider.
- All cabinets have hang-on lip, and double wall construction.
- Taller cabinets have reinforcements in the door for stability.

SHIPMENT PROTECTION

Large cartons have additional inside reinforcements for top, corners, and bottom. Cartons are shrink wrapped, and poly banded to pallets for optimum protection during transport.
